ALLCATP Sprint 2 8 Sep – 15 Sep (0 work items)

Plan your sprint

Drag work items from the Backlog section or create new ones to plan the work for this sprint. Select **Start sprint** when you're ready.

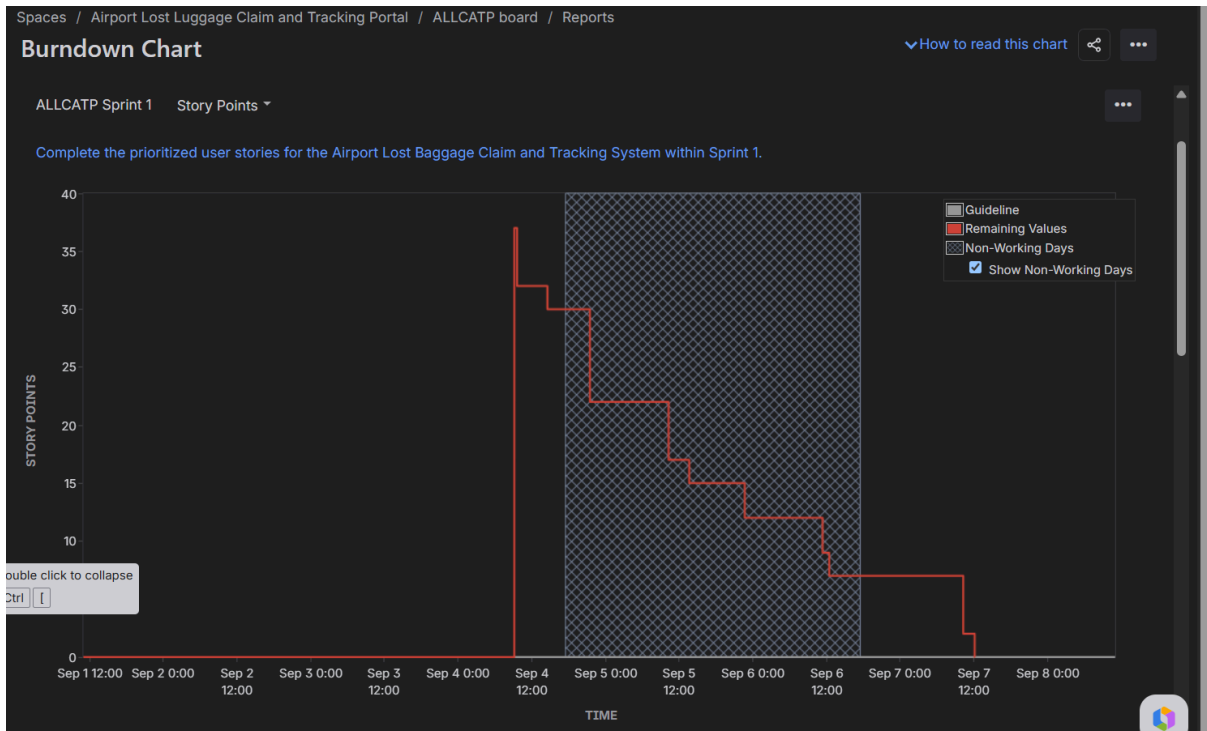

+ Create

0 work items | Estimate: 0

Backlog (0 work items)

Your backlog is empty.

+ Create

REFLECTION QUESTIONS

1. Did your estimations reflect the actual effort?

Yes. The story point estimations were reasonable for the relative complexity of the user stories. More complex tasks, such as cross-referencing baggage scan logs, were assigned higher story points, while simpler tasks were assigned lower points. Since this was a

simulated sprint, the estimations were used to represent the expected effort rather than actual development time.

2. Was your backlog well-prioritized?

Yes. The backlog was prioritized logically according to the workflow of the Airport Lost Baggage Claim and Tracking Portal. Core functionality, such as registering a lost baggage claim and confirming the claim, was prioritized before tracking, status updates, and passenger compensation features.

3. How did your simulated sprint align with your plan?

The simulated sprint successfully completed all **10 planned user stories** within the sprint. The work items progressed through the **To Do, In Progress, and Done** stages, and the sprint goal was achieved.

4. What insights did the burndown chart give about your team's capacity?

The burndown chart showed that the team was able to complete all **38 story points** within the sprint, eventually reducing the remaining work to zero. It also showed how work was completed progressively during the sprint. This suggests that the planned workload was manageable for the team's simulated capacity.
